Architecture is the stuff you can't Google.

Quote

There are no right or wrong answers in architecture—only trade-offs.

Architectural Design

Architects use knowledge and experience to analyse trade-offs to design architectures appropriate to the system context.

Definition 1. Conway's Law

Organisations design systems whose structure is inevitably a copy of the organisation's communication structure *[Conway, 1968] [MacCormack et al., 2012]*.

Conway's Law Consequences

- Business Process Management
- Microservices to reflect organisation structure
- Teams formed around services

Conway's Law Consequences

Team insularity – more loyal to team than organisation.

Conway's Law Issues

- Cross-cutting concerns
 - e.g. Security
- Organisation structure should align with market structure
- Physical location of teams
