

# Architectural Views

*Software Architecture*

Richard Thomas

March 6, 2023

*Interesting Software is Complex*

Many aspects to the design of its architecture.

*Architectural Design*

Managing technical complexity.

*Question*

How do you describe a complex architecture, without making it too difficult to understand?

### *Question*

How do you describe a complex architecture, without making it too difficult to understand?

### *Answer*

## *Architectural Views*

- Only consider one aspect at a time.

# Architectural Views

- 4+1 Views *[Kruchten, 1995]*
  - logical, process, development, physical, scenario

# Architectural Views

- 4+1 Views *[Kruchten, 1995]*
  - logical, process, development, physical, scenario
- Software Architecture in Practice *[Bass et al., 2021]*
  - module, component-and-connector, allocation

# Architectural Views

- 4+1 Views *[Kruchten, 1995]*
  - logical, process, development, physical, scenario
- Software Architecture in Practice *[Bass et al., 2021]*
  - module, component-and-connector, allocation
- Rozanski and Woods *[Rozanski and Woods, 2012]*
  - context, building block, runtime, deployment

# Architectural Views

- 4+1 Views *[Kruchten, 1995]*
  - logical, process, development, physical, scenario
- Software Architecture in Practice *[Bass et al., 2021]*
  - module, component-and-connector, allocation
- Rozanski and Woods *[Rozanski and Woods, 2012]*
  - context, building block, runtime, deployment
- NATO Architecture Framework *[Team, 2020]*
  - concepts, service, logical, physical resource, architecture foundation

# Architectural Views

- 4+1 Views *[Kruchten, 1995]*
  - logical, process, development, physical, scenario
- Software Architecture in Practice *[Bass et al., 2021]*
  - module, component-and-connector, allocation
- Rozanski and Woods *[Rozanski and Woods, 2012]*
  - context, building block, runtime, deployment
- NATO Architecture Framework *[Team, 2020]*
  - concepts, service, logical, physical resource, architecture foundation
- The Open Group Architecture Framework (TOGAF)  
*[Forum, 2018]*
- ISO/IEC/IEEE 42010:2011 *[iso, 2011]*

## 4+1 Views

Logical – *Structure* of how the software is implemented.

- components/classes, relationships, interactions

## 4+1 Views

**Logical** – *Structure* of how the software is implemented.

- components/classes, relationships, interactions

**Process** – *Dynamic* behaviour.

- concurrency & distribution, fault tolerance, process control,  
...

## 4+1 Views

Logical – *Structure* of how the software is implemented.

- components/classes, relationships, interactions

Process – *Dynamic* behaviour.

- concurrency & distribution, fault tolerance, process control,

...

Development – *Organisation* of the software in the development environment.

## 4+1 Views

Logical – *Structure* of how the software is implemented.

- components/classes, relationships, interactions

Process – *Dynamic* behaviour.

- concurrency & distribution, fault tolerance, process control,

...

Development – *Organisation* of the software in the development environment.

Physical – *Map* executable software containers to hardware.

- address non-functional requirements
  - availability, reliability, scalability, throughput, ...

## 4+1 Views

**Logical** – *Structure* of how the software is implemented.

- components/classes, relationships, interactions

**Process** – *Dynamic* behaviour.

- concurrency & distribution, fault tolerance, process control,

...

**Development** – *Organisation* of the software in the development environment.

**Physical** – *Map* executable software containers to hardware.

- address non-functional requirements
  - availability, reliability, scalability, throughput, ...

**Scenario** – *Demonstrate* functionality delivered by architecture.

- use case details
  - *drive* functional design of architecture
  - *validate* design of architecture

## Diagrams & Notation

- A *good* diagram is worth a thousand words.
  - A thousand diagrams is just confusing.

## Diagrams & Notation

- A *good* diagram is worth a thousand words.
  - A thousand diagrams is just confusing.
- UML – formal, well-defined language *[uml, 2017]*
- C4 – informal, simple structure *[Brown, 2022]*
- You probably don't want to know about alternatives.

*Reading...*

“Architectural Views” Notes<sup>1</sup> *[Thomas and Webb, 2022]*

---

<sup>1</sup>Remember, I said you had to read the notes.
