

DevOps

*Software Architecture*

Brae Webb

March 24, 2026

*Question*

Who has heard of *DevOps*?

*Question*

Who has used *DevOps*?

# The larger story

Server Config Config Management

Application Config Config Files

Provisioning Infrastructure Code

Building Continuous Integration

Deployment Continuous Deployment

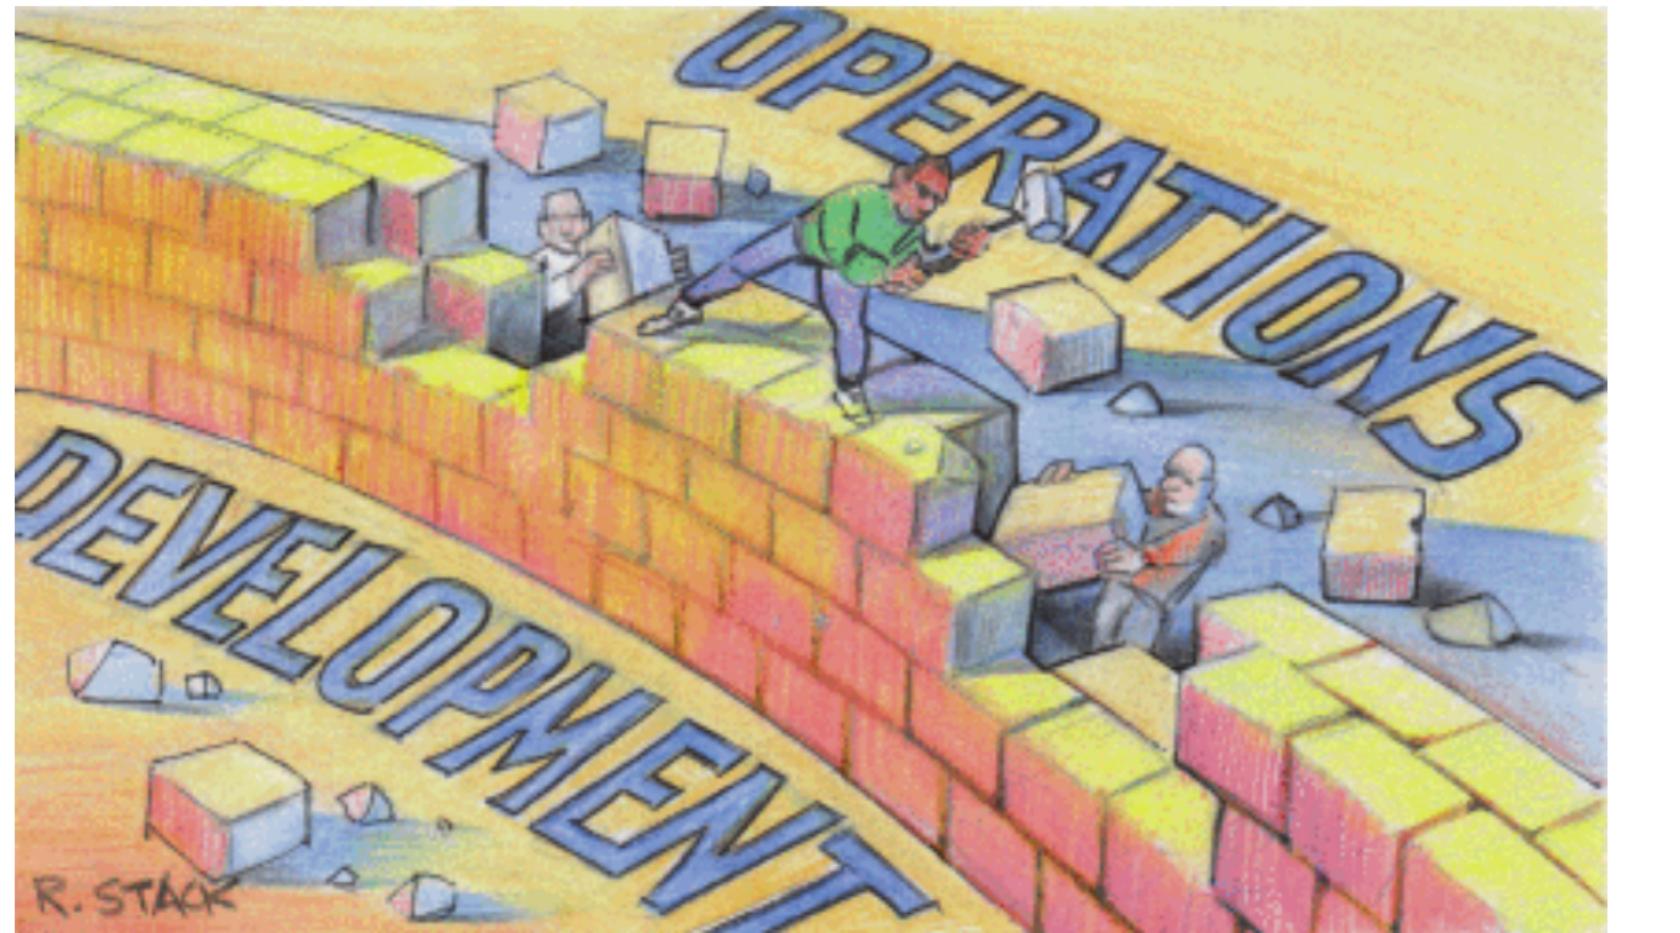

Testing Automated Tests

Database Administration Schema Migration

Specifications Behaviour Driven Development

*Question*

What is *DevOps*?

R. STACK

*What is DevOps?* [Senapathi et al., 2018]

- A combination of *software development* and *IT operations* skills

*What is DevOps?* [Senapathi et al., 2018]

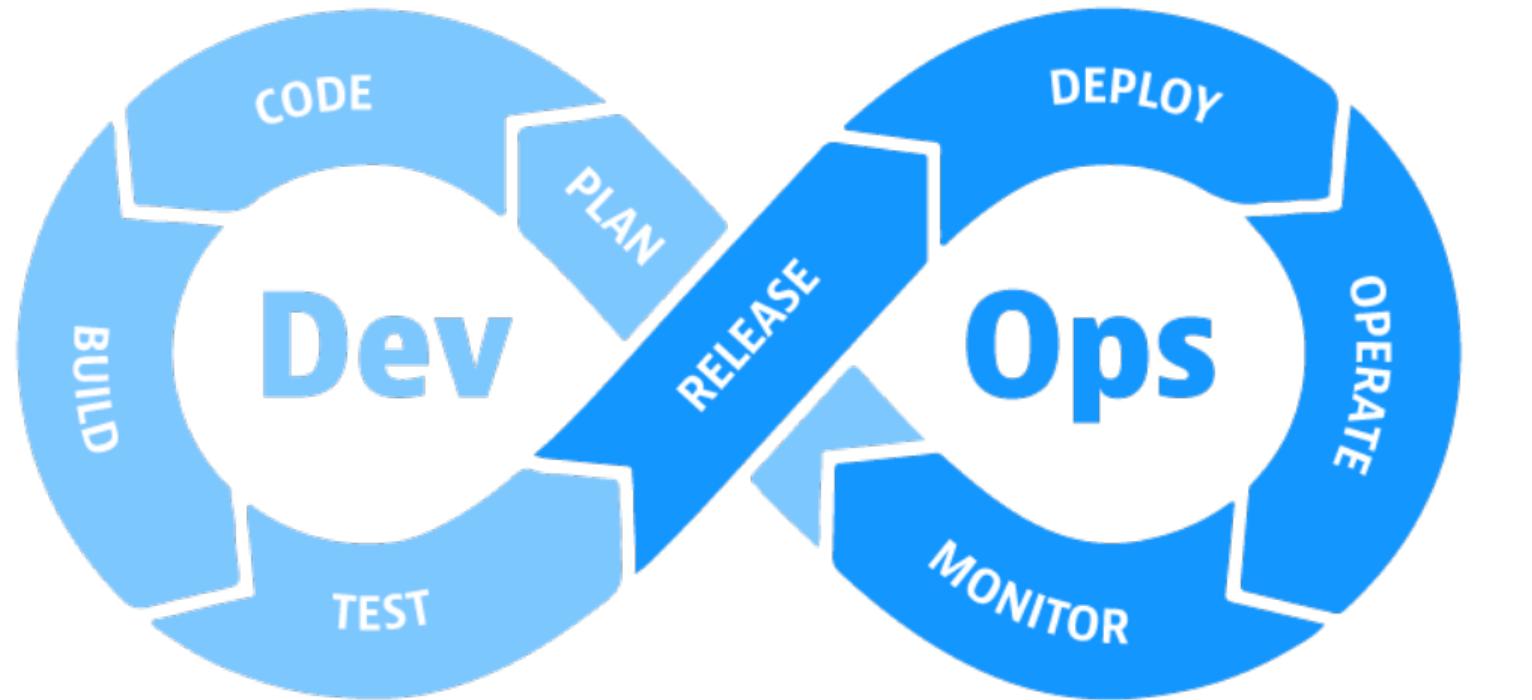

- A combination of *software development* and *IT operations* skills
- A *cultural movement* that enables rapid development with four defining characteristics: open communication, incentive and responsibility alignment, respect, and trust

*Important*

Continuous \*

*Also Important*

If it hurts, do it more often

## *Tooling*

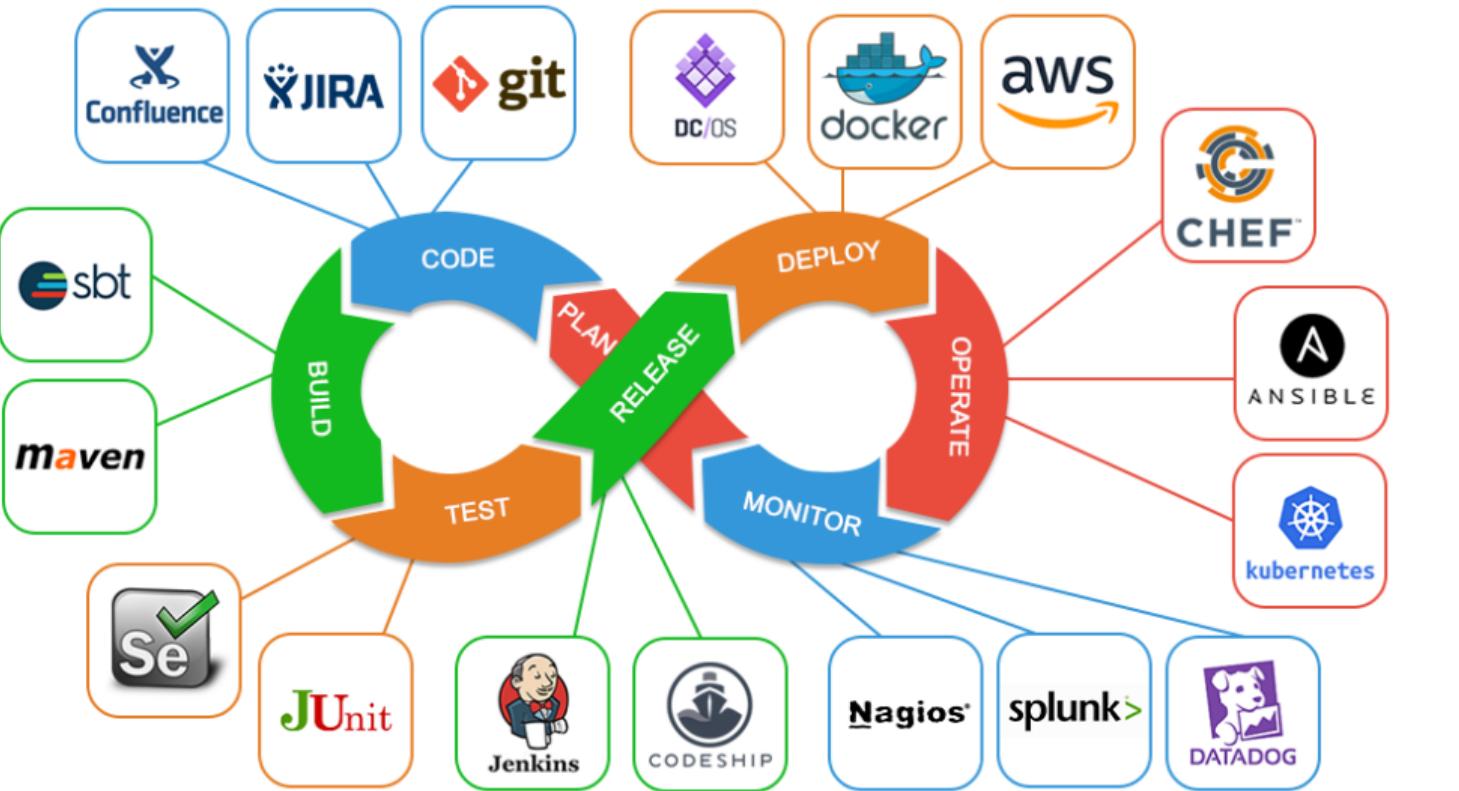

1. Continuous *development*
2. Continuous *integration*
3. Continuous *testing*
4. Continuous *deployment*
5. Continuous *operations*
6. Continuous *monitoring*
7. Continuous *feedback*

*Small Group Discussion*

Describe the tools you have identified for the Continuous \* practices.

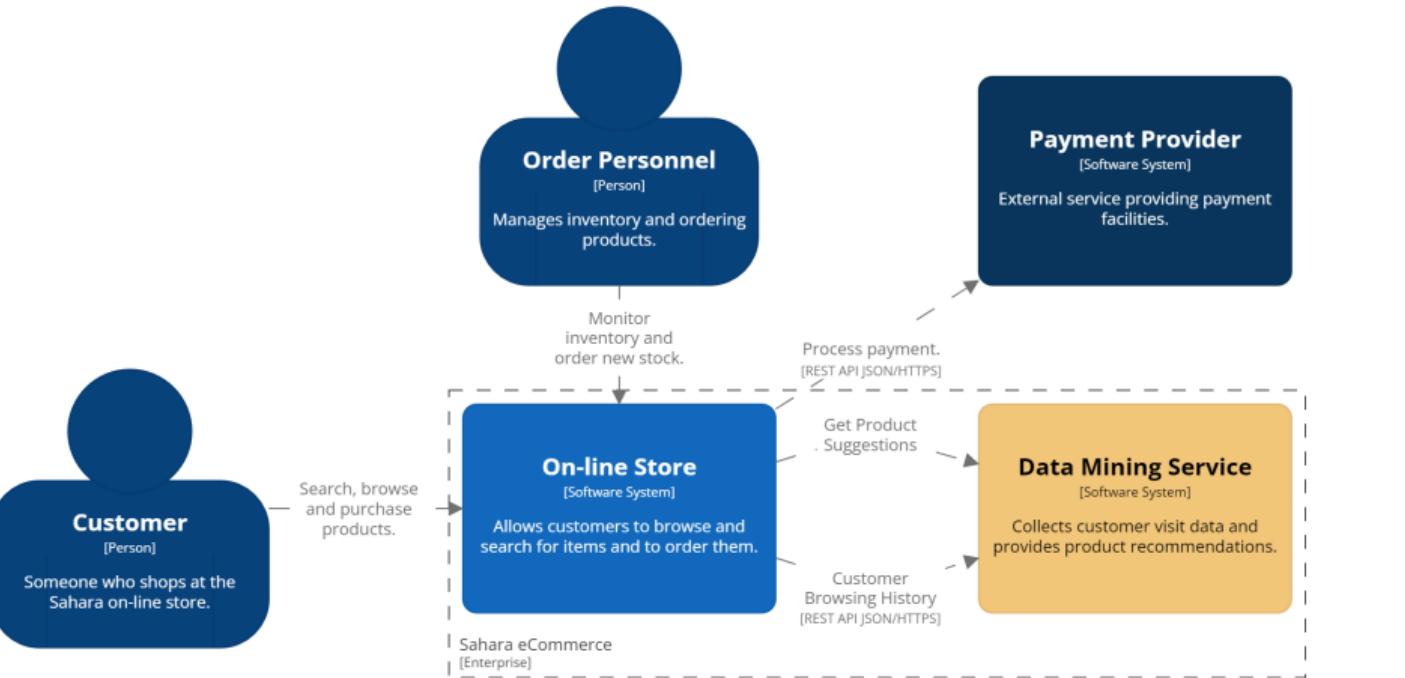

*Class Discussion*

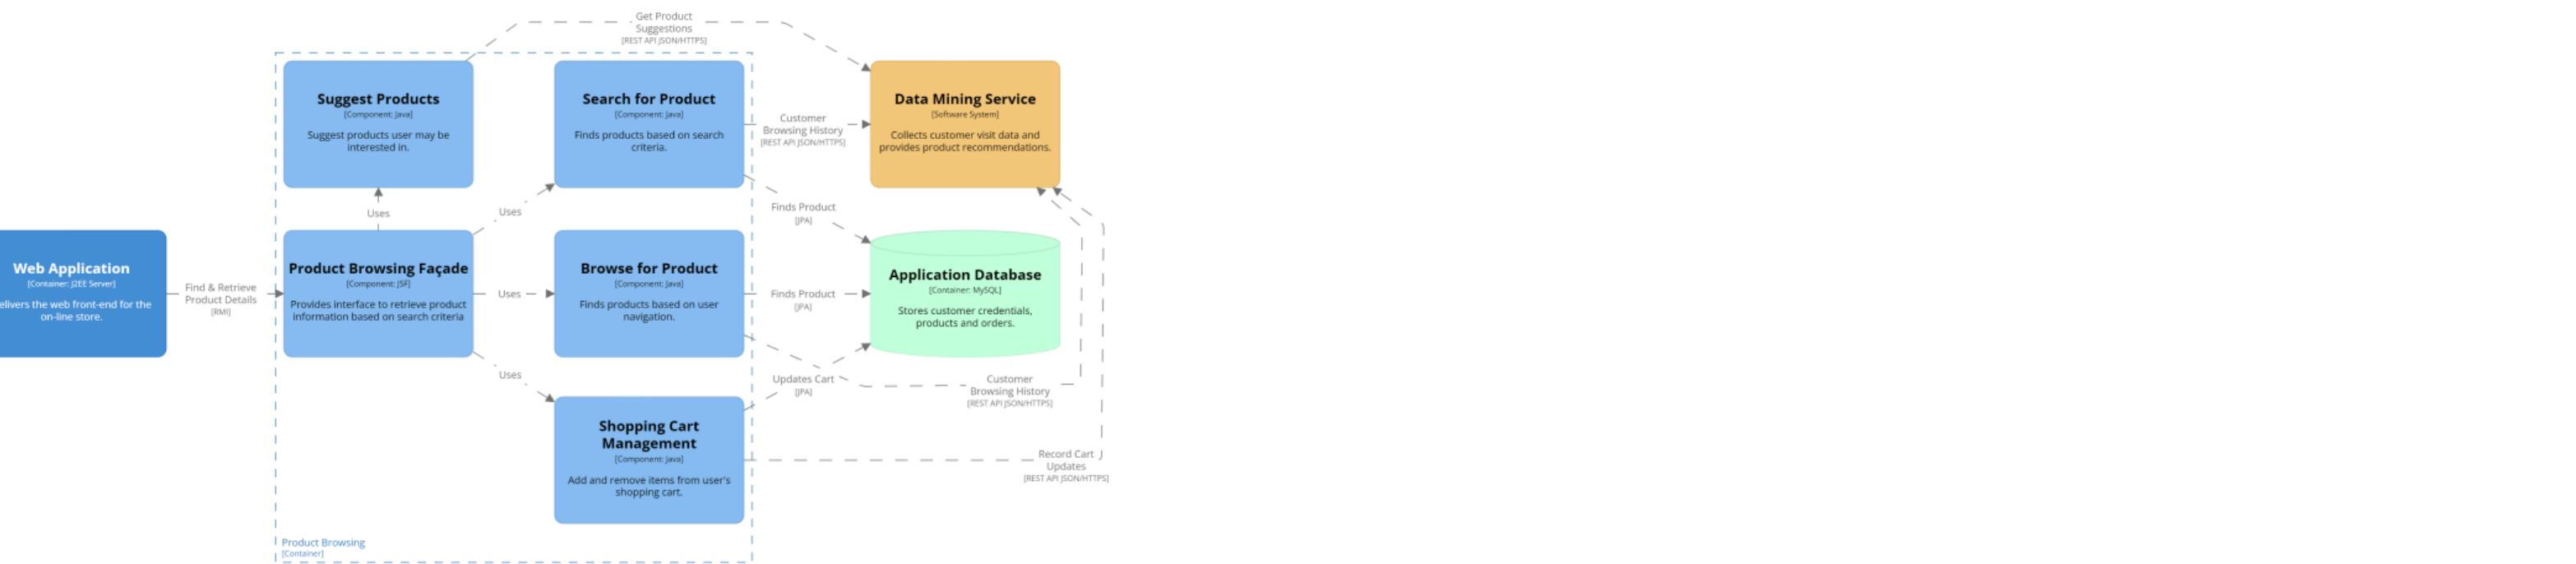

Summarise the tools identified by each group  
and the practices they support.

*Today*

Design a DevOps pipeline for *Sahara*

*Sahara Pipeline*

1. What *types of tools* would be required?

*Sahara Pipeline*

1. What *types of tools* would be required?
2. Which *specific tools* would you choose?

*Sahara Pipeline*

1. What *types of tools* would be required?
2. Which *specific tools* would you choose?
3. On which type of *computing infrastructure* would you deliver the system?

*Sahara Pipeline*

1. What *types of tools* would be required?
2. Which *specific tools* would you choose?
3. On which type of *computing infrastructure* would you deliver the system?
4. What parts of the deployment and operations processes could be *automated*?

*Discussion*

Present the DevOps pipelines that you have developed to the rest of the class.

*Challenge 1: DevOps in Practice*

Do the seven necessary *DevOps practices* map perfectly to the *enablers* in the article by Senapathi et al [Senapathi et al., 2018]?

## *Technological Enablers*

- *Build* automation
- *Test* automation
- *Deployment* automation
- *Monitoring* automation
- *Recovery* automation
- *Infrastructure* automation
- *Configuration* management for code and infrastructure
- *Metrics* automation
