$Software\ Architecture$

Richard Thomas

February 26, 2024

Interesting Software is Complex

Many aspects to the design of its architecture.

Architectural Design

Managing technical complexity.

Question

How do you describe a complex architecture, without making it too difficult to understand?

Question

How do you describe a complex architecture, without making it too difficult to understand?

Answer

Architectural Views

- Only consider one aspect at a time.

- C4 Model [Brown, 2023]
 - context, structure, behaviour, infrastructure

- C4 Model [Brown, 2023]
 - context, structure, behaviour, infrastructure
- 4+1 Views [Kruchten, 1995]
 - logical, process, development, physical, scenario

- C4 Model [Brown, 2023]
 - context, structure, behaviour, infrastructure
- 4+1 Views [Kruchten, 1995]
 - logical, process, development, physical, scenario
- Software Architecture in Practice [Bass et al., 2021]
 - module, component-and-connector, allocation

- C4 Model [Brown, 2023]
 - context, structure, behaviour, infrastructure
- 4+1 Views [Kruchten, 1995]
 - logical, process, development, physical, scenario
- Software Architecture in Practice [Bass et al., 2021]
 - module, component-and-connector, allocation
- NATO Architecture Framework [Team, 2020]
 - \bullet concepts, service, logical, physical resource, architecture foundation

- C4 Model [Brown, 2023]
 - context, structure, behaviour, infrastructure
- 4+1 Views [Kruchten, 1995]
 - logical, process, development, physical, scenario
- Software Architecture in Practice [Bass et al., 2021]
 - module, component-and-connector, allocation
- NATO Architecture Framework [Team, 2020]
 - \bullet concepts, service, logical, physical resource, architecture foundation
- The Open Group Architecture Framework (TOGAF)
 [Forum, 2018]
- ISO/IEC/IEEE 42010:2011 [iso, 2011]

Context

• How software system fits into broader *environment*

Context

• How software system fits into broader *environment*

Structure – Containers, Components, Code

• *Levels* of detail

Context

- How software system fits into broader *environment*
- Structure Containers, Components, Code
 - *Levels* of detail
- Behaviour Dynamic
 - How elements *interact* to deliver features

Context

- How software system fits into broader *environment*
- Structure Containers, Components, Code
 - *Levels* of detail
- Behaviour Dynamic
 - How elements *interact* to deliver features
- Infrastructure Deployment
 - How system is *deployed* on computing platforms

Logical – Structure of how the software is implemented

• components/classes, relationships, interactions

- Logical Structure of how the software is implemented
 - components/classes, relationships, interactions

Process – *Dynamic* behaviour

• concurrency & distribution, fault tolerance, process control,

...

- Logical Structure of how the software is implemented
 - components/classes, relationships, interactions
- Process *Dynamic* behaviour
 - concurrency & distribution, fault tolerance, process control, ...
- Development Organisation of the software in the development environment

- Logical Structure of how the software is implemented
 - components/classes, relationships, interactions
- Process *Dynamic* behaviour
 - concurrency & distribution, fault tolerance, process control, ...
- Development *Organisation* of the software in the development environment
 - Physical -Map executable software containers to hardware
 - address non-functional requirements
 - \bullet availability, reliability, scalability, throughput, \dots

- Logical Structure of how the software is implemented components/classes, relationships, interactions
- Process *Dynamic* behaviour
 - concurrency & distribution, fault tolerance, process control, ...
- Development *Organisation* of the software in the development environment
 - Physical Map executable software containers to hardware
 - address non-functional requirements
 - availability, reliability, scalability, throughput, ...
- Scenario *Demonstrate* functionality delivered by architecture
 - use case details
 - *drive* functional design of architecture
 - validate design of architecture
 - *illustrate* purpose of architecture

Diagrams & Notation

- A *good* diagram is worth a thousand words
 - A thousand diagrams is just confusing

Diagrams & Notation

- A good diagram is worth a thousand words
 - A thousand diagrams is just confusing
- C4 informal, simple structure [Brown, 2023]
- UML formal, well-defined language [uml, 2017]
- You probably don't want to know about alternatives
