

AWS Academy

February 23, 2026

Richard Thomas

Presented for the Software Architecture course
at the University of Queensland

THE UNIVERSITY
OF QUEENSLAND
AUSTRALIA

1 Introduction

In this course we use AWS Academy as a resource to learn how to deploy and manage infrastructure on Amazon Web Services (AWS), as an example of a cloud based Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) environment. You have been enrolled in three AWS Academy courses, as well as the AWS Learner Lab. We expect you to work your way through at least two of the AWS Academy courses as self-study material. The [CSSE6400 course schedule](#)¹ provides a guide as to when we expect you to complete particular modules in the [AWS Academy Cloud Foundations](#)², and [AWS Academy Cloud Architecting](#)³ courses.

The [AWS Academy Cloud Developing](#)⁴ course is provided as a supplementary resource. It covers much of the same content as [AWS Academy Cloud Architecting](#), but [AWS Academy Cloud Architecting](#) does so in a more structured and progressive manner. [AWS Academy Cloud Developing](#) treats each topic a little more independently. The advantage of this is that it also covers a couple of other topics, such as REST APIs and Containers, that you may find useful.

[AWS Academy Learner Lab](#)⁵ will be used in practical sessions from week 4 onwards. You have a second [Learner Lab](#)⁶ to use for the Cloud Infrastructure assignment, so that you start with a fresh budget for the assignment. You have a budget of **\$50 USD** for each Learner Lab. Once you have spent a Lab's budget, you will not be able to use that Learner Lab.

You need to accept your enrolment into:

- AWS Academy Cloud Foundations [[152629](#)] course;
- AWS Academy Cloud Architecting [[152631](#)] course;
- AWS Academy Cloud Developing [[152630](#)] course;
- AWS Academy **Practicals** Learner Lab [[152632](#)] course; and
- AWS Academy **Assignment** Learner Lab [[152633](#)] course.

And then login to the AWS Academy and navigate to your courses.

2 AWS Academy

AWS Academy is an educational platform to teach you how to use AWS services. The content has been created by key developers in the AWS team.

2.1 Enrol in AWS Academy

1. Set up your AWS Academy account by responding to your email invitation and clicking **Get Started**. The email invitation will come from AWS Academy. Check your junk/spam folders.

2. Go to https://www.awsacademy.com/vforcesite/LMS_Login to login.
 - (a) Press **Student Login**.
 - (b) Use the email address that received the email invitation.

2.2 Exploring the Interface

Once you login, you should see your account dashboard. This lists the courses in which you are enrolled.

The screenshot shows the AWS Academy dashboard. On the left is a dark sidebar with navigation links: Account, Dashboard, Courses, Calendar, Inbox, History, and Help (with a notification badge). The main area has a top notification bar for event notifications. Below is the 'Dashboard' title. A grid of four course cards is displayed, each with a colored header and course details. On the right, there are sections for 'To do' (Nothing for now), 'Recent feedback' (Nothing for now), and a 'View Grades' button.

Notifications. Tell us how and when you would like to be notified of events in Canvas.

Click on a course to go to its home page.

The screenshot shows the course home page for 'AWS Academy Cloud Foundations [110989]'. The sidebar is updated with 'Home' as the active link. The main content area includes a header with the course title, a large graphic of a classical building, and a description of the course. It also features a 'Get Started' section with three icons: a laptop for modules, speech bubbles for discussions, and a headset for help. On the right, there are buttons for 'View Course Stream', 'View Course Calendar', and 'View Course Notifications', followed by 'To Do' and 'Recent Feedback' sections, both showing 'Nothing for now'.

Get Started

Select [Modules](#) to start the course. Use [Discussions](#) to connect with peers. Visit [Course Support](#) for help.

Navigate to the `Modules` tab and you will see the list of modules and their learning content for the course. The content includes videos, readings, and self-assessment exercises. The self-assessment exercises are to help you to know that you understand the content. These are not used as part of your assessment in this course.

The screenshot displays the AWS Academy interface for a specific course. On the left is a dark sidebar with navigation icons for Account, Dashboard, Courses, Calendar, Inbox, History, and Help. The top navigation bar shows the course ID 'ACFv2EN-LTI13-110989' and the 'Modules' tab. Below the navigation bar, a list of course sections is visible: Home, Announcements, Modules (selected), Discussions, Grades, and Lucid (Whiteboard). A 'Collapse All' button is located in the top right corner. The main content area is divided into two sections. The first section, titled 'Introduction', contains a list of items: Pre-Course Survey, Trends in Cloud Computing, Course Introduction Video, Student Guide, How to complete lab exercises, Course Support, and General Discussion. The second section, titled 'Module 1 - Cloud Concepts Overview', contains two items: Introduction Video and Section 1 Video - Introduction to cloud computing.

Explore the AWS Academy interface and courses. Start working through the [AWS Academy Cloud Foundations⁷](https://awsacademy.instructure.com/courses/152629) course. You should aim to complete *at least* half of it this week. Completing all of it this week will let you start the [AWS Academy Cloud Architecting⁸](https://awsacademy.instructure.com/courses/152631) course next week, which will give you more breathing space to work through that content.
